

HandiSolutions introduces our new Handi Hide-A-Wire Kit. This product provides a unique and functional means to route wires on a wall that has Handiwall™ panels applied to it. The product utilizes a special horizontal wire manager that simply snaps into the Handiwall™ while aesthetically hiding unsightly wires. Also provided is a vertical wire manager that snaps closed to conceal the wiring and connectors for routing the wiring in the desired direction. This product is great for all kinds of items such as a clock, sign, or light that is mounted on the wall. Plus, this product is perfectly color matched to all the Handiwall™ colors. And, for ease of installation the wire managers can easily be cut to size at the job site.

Each Kit contains the following:

- 1 • Horizontal Wire Manager 96.00"
- 1 • Vertical Wire Manager 96.00"
- 1 • Three Way Connector
- 1 • 90 Degree Connector
- 1 • Straight Connector

Handi Hide-A-Wire part numbers and colors:

- HSWR100B - Black
- HSWR100G - Gray
- HSWR100M - Maple
- HSWR100T - Taupe
- HSWR100W - White

HandiSolutions introduces a new and unique way to manage those unsightly wires on your garage ceiling. This Hide-A-Wire kit provides our unique locking wire raceway channel to help you organize those garage door wires on the ceiling and make them virtually disappear. Simply route the wiring inside the channel and snap it closed and apply by using the twin stick tape on the back. Product is color matched white to match most ceilings.

Each kit contains the following:

- 8 pcs Vertical Wire Manager 96.00", White
